This is the first office action for serial number 09/574,783, entitled Connecting Unit For The Angle-Adjustable Connection Of At Least Two Loudspeaker Enclosure, and Correspondingly Connected Loudspeaker Enclosures, filed on May 19, 2000.

### **Abstract**

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract of the disclosure is objected to because the form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided as found on line 10. Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11, 13-15, and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Martin 5,758,852. Martin discloses a first support and second support (28 and 27), first and

second enclosures being loudspeakers, an articulation connection (26), an angle adjustment device (31 and 32), first and second support elements (1).

***Allowable Subject Matter***

Claims 12 and 16-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
